

Radiology Viewers

Description

Transforma provides a built-in flush mounted X-ray viewer solution that matches the modular wall panel solution provided in Operation rooms and other areas requested by clients. The LED technology used in the specialized X-ray viewers allows for a longer lifetime, lower energy consumption and provides the type of light that is more suitable to read X-ray films with no flickering to reduce the possibility of causing any eye fatigue for the user.

Dimensions	
X-ray viewer dimensions	Height: 505 mm (Standard) Width (Option 1): 457 mm Width (Option 2): 817 mm (Standard)

Technical Data	
Chassis	Body composed of anti-scratch anodized aluminum
Light Source	LED with 5000 cd/mq (7200 K)
Dimming	30%-100% dimming control

Film grip	Incorporated
Power Supply	230 V; 50/60 Hz
Origin	Italy

Certificates and Standards:

- All components in conformity with EC regulations UL, DVE and IMQ approved
- Appliance complies with Low Voltage Directive 2014/35/CE
- Appliance complies with Electro Magnetic Compatibility 2014/30/CE
- Appliance in conformity with EEC Directive 2007/47 medical device Class I
