

Xorel Modular Wall Panels

Description:

Transforma provides a modular wall panel system designed and manufactured for specific use in operation rooms and other areas in hospitals; the panels are manufactured with high precision using MDF covered with a special textile medical grade fabric.

Xorel is a high performance, innovative and sustainable interior textile. Xorel was designed from a simple 3-part premise:

- Create a textile whose high performance is inherent to the raw material.
- Leverage its woven construction to enable a wide variety of aesthetic possibilities.
- Ensure that its affect on the environment is always minimal and could always be improved.

Xorel is the most thoroughly tested interior textile material on the market. More than 65 independent tests vet its performance and characteristics in areas as varied as durability, cleanability, acoustics, indoor air quality, bacterial resistance, washability, solvent resistance and others.

Dimensions	
Panel Width	Max. 1,200 mm
Panel Height	Max. 2,400 mm
Panel Thickness	23 mm

Technical Data	
Panel Composition	Medical grade Xorel Upholstery
	18mm thick Medium Density Fiberboard (MDF)
	1 mm thick Galvanized Steel fixture supports attached to MDF
Surface finish options	A variety of textures and color finishes of the medical grade Xorel Upholstery
Fixture method	Screws on Galvanized Steel supporting structure
Fixture covering	Silicone gasket
Origin	USA

Standards & Certification:

- ASTM E84 Class A/ Class 1
- UL 1286
